

Title: ParkerVision Inc.(forms alliances with PrairieComm Inc, Texas Instruments for product development)(Brief Article)

Date: 8/1/2001; **Publication:** Microwave Journal;

ParkerVision Inc. and PrairieComm Inc. have signed a definitive agreement to jointly develop advanced chipsets and reference designs for cellular handsets and other wireless devices. The chipsets will utilize PrairieComm's state-of-the-art baseband IC platforms with ParkerVision's innovative Direct2Data direct conversion radio technology. In related news, ParkerVision announced an agreement with Texas Instruments to develop advanced RF solutions that enable enhanced wireless connectivity, while reducing system size, cost and overall power consumption in the next generation of wireless handsets.
