Wireless Channel: Micro Center to Sell ParkerVision Networking Products

WIRELESS NEWS-23 October 2004-Wireless Channel: Micro Center to Sell ParkerVision Networking Products (C)2004 10Meters - [http:// www.10meters.com](http://www.10meters.com)

ParkerVision this week announced that Micro Center will sell its SignalMAX wireless networking products.

ParkerVision said SignalMAX products are compatible with all 802.11b/g compliant products and are guaranteed to improve distance and eliminate "dead-zones" even when used with other manufacturers' gear. SignalMAX products are based on the company's Direct2Data (D2D) wireless RF technology.

"Micro Center is excited to offer the ParkerVision SignalMAX brand of wireless networking products," said Will Rodemann, Buyer for Micro Center. "Micro Center is a strong addition to the growing list of high-quality retailers that are providing ParkerVision's SignalMAX brand of wireless networking products to their customers, for their home, at the office, or on the road," said Jeffery L. Parker, Chairman, and CEO of ParkerVision.

ParkerVision, headquartered in Jacksonville, Fla., designs, develops and manufactures solutions for wireless products.

Micro Center, a retailer focused on computer and computer-related products, operates 20 stores in major markets nationwide.
